Project Report

20 Days Impact Training Report

"Hitbullseye Phrase impact training"

Submitted by

"Meet Patel"

Under the Guidance of

"Hitbullseye"

"Training and placement cell"

In partial fulfillment for the award of the degree *of*

BACHELOR OF TECHNOLOGY

in

INFORMATION TECHNOLOGY

Parul Institute of Engineering and Technology,
Parul University, Vadodara,

Gujarat.

Sept – 2025

Parul Institute of Engineering & Technology

CERTIFICATE

This is to certify that the project report submitted along with the project entitled **Hitbullseye Impact Training** has been carried out **Patel Meet Hemantbhai(2203031080049)** under my guidance in partial fulfillment for the degree of Bachelor of Engineering in Information Technology, 7th Semester of Parul University, Vadodara during the AY 2024-25.

Internal Guide

Head of the Department

Parul Institute of Engineering & Technology, Vadodara

DECLARATION

We hereby declare that the Internship / Project report submitted along with the Internship / Project entitled entitled **Hitbullseye Impact Training** submitted in partial fulfillment for the degree of Bachelor of Engineering in Information Technology to Parul University, Vadodara, is a bonafide record of original project work carried out by me / us at PIET under the supervision of Hitbullseye and that no part of this report has been directly copied from any students' reports or taken from any other source, without providing due reference.

Overview of the Company

1 **1.1 History**

Hitbullseye is one of India's leading online test-preparation and career development enterprises. Founded by seasoned educationists with decades of experience in competitive exam coaching, Hitbullseye has grown into a trusted brand for aptitude, reasoning, verbal ability, and soft skills training. With more than 20 years of expertise and having mentored over 100,000 students across various competitive and campus recruitment exams, Hitbullseye has evolved from a traditional coaching provider to a comprehensive online learning partner.

The services offered at Hitbullseye include Online Test Series, Mock Exams, Video Lectures, Concept Building Modules, Soft Skills & Personality Development Training, Corporate Training Programs, and dedicated LMS platforms for students and institutions.

Bringing together its strong pedagogy, cutting-edge technology, and analytics-driven approach, Hitbullseye delivers an end-to-end learning solution for students and professionals alike. Its AI-powered platform is a one-stop shop for all preparation needs—spanning competitive exams, placements, and skill development.

1.1 Different product / scope of work

Hitbullseye services are broadly diversified across key business verticals:

- **B2C Test Preparation**: Comprehensive online and classroom coaching for competitive exams such as CAT, XAT, SNAP, NMAT, CLAT, IPMAT, CUET, and other management, law, and government entrance exams. The offerings include test series, video lectures, concept notes, and full-length mock exams.
- **AI-Powered Content & Tech Solutions for Schools & Colleges**: Providing customized SaaS-based e-learning platforms, adaptive assessments, question banks, and analytics dashboards that enable institutions to deliver digital-first education and track student performance.
- **B2B College Training & Outreach**: Partnering with higher education institutions to conduct campus training programs, enhance institutional branding, and increase student engagement through digital platforms and workshops.
- **Skill Development & Corporate Training**: Delivering specialized soft skills, communication, leadership, and personality development programs, along with placement readiness modules for colleges and corporate organizations.

1.2 Capacity of plant

As an educational technology and test-preparation company, Hitbullseye's "capacity" is defined by its ability to deliver high-quality learning experiences and large-scale exam preparation solutions.

The company has:

- A team of **100+ expert faculty members and mentors**, including alumni from top institutes such as IIMs, XLRI, NLU, and DU.
- An extensive **question bank with more than 2 lakh practice questions** and thousands of mock tests across multiple exam categories.
- An advanced **AI-driven online learning platform** capable of hosting **tens of thousands of concurrent learners** with personalized performance analytics.
- A strong **pan-India presence through its digital platform**, along with tie-ups with numerous colleges and universities for training and placement support.

1.3 Key Statistics and Growth

This section presents key metrics and figures highlighting Hitbullseye's growth and impact in the education sector.

- **20+ years of experience** in test preparation and skill development.
- **Mentored over 100,000 students** across competitive exams such as CAT, CLAT, IPMAT, CUET, and other national-level tests.
- **Content repository of 200,000+ questions**, video lectures, and eBooks across various subjects.
- **AI-powered learning platform** delivering adaptive tests, performance analytics, and personalized learning pathways.
- **Partnerships with 50+ colleges and institutions** for campus training, skill development, and placement readiness.
- **Strong national digital presence**, with lakhs of annual portal visitors and thousands of concurrent learners.

Figure 1.1: Growth in Student Base

This figure illustrates the growth in the number of students empowered by Hitbullseye's platform over time.

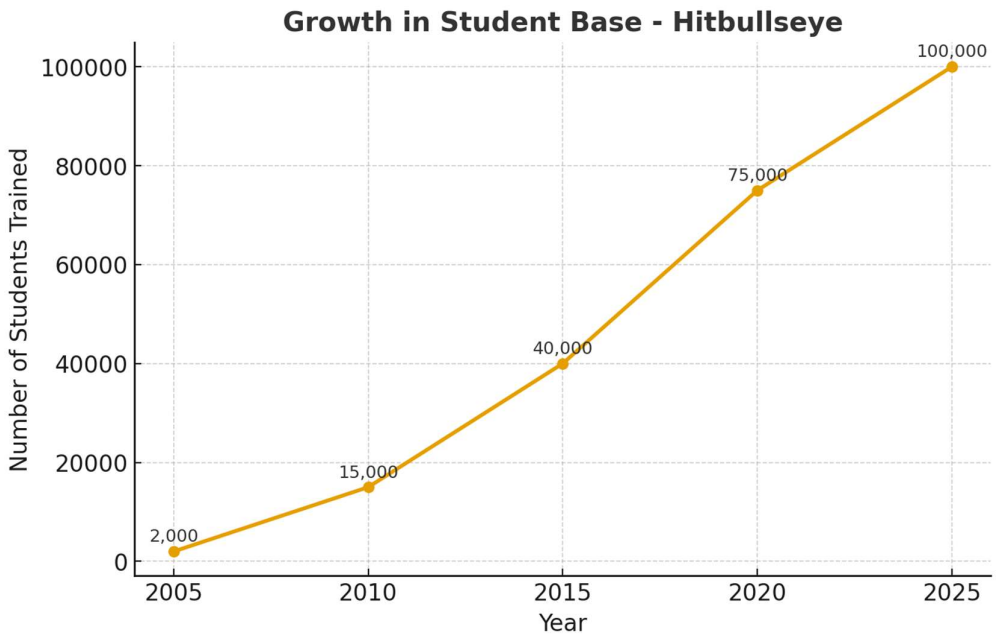

Figure 1.2: Question Bank Growth

This figure shows the exponential growth of the company's proprietary question bank, which is a core asset of its learning platform.\

Figure 1.2: Question Bank Growth

2.0 Overview of different plant/unit/department/shop of the organization and Layout of the production/process being carried out in company

2.1 Details about the work being carried out in each department

The "departments" in the context of Hitbullseye are the subject-specific and training-focused teams.

- **Quantitative Aptitude Department**: This team designs the curriculum and practice resources for arithmetic, algebra, geometry, modern math, and data interpretation. Their focus is on simplifying problem-solving, building speed with shortcuts, and strengthening conceptual foundations for exams.
- **Verbal Ability Department**: This department manages all English language training content, including grammar, vocabulary, reading comprehension, and critical reasoning. Their work emphasizes sharpening communication, analytical ability, and test-taking strategies.
- **Logical Reasoning & Data Interpretation Department**: This team creates training modules around logical puzzles, arrangements, syllogisms, coding-decoding, and analytical reasoning. They also develop advanced DI sets to enhance quick interpretation and decision-making skills under timed conditions.
- **General Knowledge & Current Affairs Department**: Dedicated to preparing students for GK and current events required in exams like CLAT, IPMAT, and MBA entrances. This includes monthly digests, quizzes, and interactive GK capsules.
- **Soft Skills & Personality Development Department**: This department develops modules for group discussions, personal interviews, resume building, and communication skills. Their focus is on holistic employability and campus placement readiness.
- **Technology & E-Learning Department**: Responsible for maintaining Hitbullseye's AI-powered LMS, online test series, video lecture library, and digital student analytics. They ensure scalability, seamless access, and personalized learning experiences for thousands of users.

2.2 List the technical specifications of major equipment used in each department.

- **Platform: Six Phrase's** proprietary Learning Management System (LMS)
- **Tools:**
  - **Quant/Verbal/Reasoning:** AI-driven diagnostic tests and performance analytics dashboards.
  - **Java:** Integrated Development Environment (IDE) like VS Code or IntelliJ IDEA, online coding compilers for immediate feedback.
- **Content:** A vast digital library of e-books, video lectures, and practice questions.

2.3 Prepare schematic layout which shows the sequence of operation for manufacturing of end product.

(In this context, the "end product" is a skilled and knowledgeable candidate.)

Candidate Onboarding

```
|
|-- Baseline Assessment (Initial Skill Analysis)
|
|-- Module 1: Quantitative Aptitude
|   |-- Theory & Concepts
|   |-- Practice Sessions
|   |-- Topic-wise Quizzes
|
|-- Module 2: Verbal Ability
|   |-- Theory & Concepts
|   |-- Practice Sessions
|   |-- Topic-wise Quizzes
|
|-- Module 3: Logical Reasoning
|   |-- Theory & Concepts
|   |-- Practice Sessions
|   |-- Topic-wise Quizzes
|
|-- Module 4: Java Programming
|   |-- Introduction to Java
|   |-- OOPS Concepts
|   |-- Hands-on Coding
|
|-- Consolidated Learning & Revision
|
|-- Final Assessment (Mock Tests)
|
|-- Performance Analysis & Feedback
|
|-- Report Submission & Certification
```

2.4 Explain in details about each stage of production.

- **Baseline Assessment:** An initial diagnostic test is administered to gauge the candidate's current proficiency in all four subjects, which helps in identifying areas for improvement.
- **Modular Learning:** The training is divided into four distinct modules. Each module follows a pedagogical approach of theory, practice, and assessment. Instructors use a combination of lectures, interactive sessions, and real-time problem-solving to impart knowledge.
- **Consolidated Learning:** The final week of the training focuses on reviewing all the topics and integrating the knowledge from different modules.
- **Final Assessment:** Full-length mock tests are conducted to simulate the actual exam environment and evaluate the candidate's overall readiness.

- **Performance Analysis & Feedback:** Detailed analytics are provided on the mock tests, highlighting strengths and weaknesses. Mentors offer personalized feedback to help the candidate strategize for future preparation.

3.0 Introduction to Project / Internship and Project / Internship Management

3.1 Project / Internship Summary

This report summarizes a 20-day Impact Training Program at Hitbullseye, where the primary focus was on enhancing my skills in quantitative, verbal, and logical reasoning, as well as gaining a solid foundation in Java programming. The project was centered on a structured learning model aimed at holistic skill development.

3.2 Purpose

The purpose of this training was to bridge the gap between theoretical academic knowledge and the practical skills required to excel in competitive exams and the corporate world. It aimed to provide a comprehensive and intensive learning experience that would significantly boost my aptitude and technical abilities.

3.3 Objective

The main objectives were to:

- Become proficient in problem-solving techniques for Quantitative Aptitude.
- Improve English comprehension and communication skills.
- Enhance logical and analytical thinking.
- Master core concepts of Java programming, including OOPS and basic DSA.

3.4 Scope

- **What it can do:** The training provided a strong foundation in all four subjects, equipping me with the necessary tools and techniques to solve a wide variety of problems. It also offered exposure to a professional training environment and industry-standard practices.
- **What it can't do:** The 40-day duration is not sufficient for becoming an expert in all the subjects. Continued self-practice and advanced learning are required to achieve mastery. It also doesn't cover advanced topics like complex data structures, full-stack development, or machine learning.

3.5 Technology and Literature Review

The training primarily utilized Hitbullseye's online learning platform Hitbullseye, which incorporates AI to provide personalized learning paths and real-time performance analytics. The Java curriculum followed an industry-standard syllabus for foundational programming, including concepts from books like "Head First Java" and online resources like Oracle's Java documentation.

3.6Project / Internship Planning

3.6.1 Project / Internship Development Approach and Justification

The training followed a modular and iterative approach. Each subject was treated as a distinct module, with learning progressing from fundamental concepts to advanced problem-solving. This approach was justified as it allowed for focused learning on each skill area before integrating them through comprehensive mock tests.

3.5.1 Project / Internship Effort and Time, Cost Estimation

The project duration was a fixed 20 days, from May 5 to May 29, 2025. The daily effort was approximately 6 hours, including theory sessions, practice, and self-study. The cost was covered by the training program's fee.

3.5.2 Roles and Responsibilities

- **Candidate's Role:** Active participation in all sessions, timely completion of assignments, and self-practice.
- **Mentors' Role:** Delivering lectures, providing one-on-one doubt clarification, and providing personalized feedback on performance.

3.5.3 Group Dependencies

The training was structured as a group program, which fostered a collaborative environment. Learning from peers and engaging in group discussions were crucial for understanding complex topics and alternative problem-solving methods.

3.6 Project / Internship Scheduling (Gantt Chart)

3.7 Project / Internship Scheduling (Gantt Chart)

Task	Start Date	End Date	Status
Quant Module	May 5, 2025	May 9, 2025	Completed
Verbal Module	May 14, 2025	May 22, 2025	Completed
Reasoning Module	May 23, 2025	May 19, 2025	Completed
Revision & Mock Tests	Java 10, 2025	May 20, 2025	Completed

4.0 System Analysis

4.1 Study of Current System

The "current system" refers to my skill set prior to the training. While I had a basic understanding of some concepts from my academic curriculum, the knowledge was fragmented and lacked the structured approach required for competitive exams. My problem-solving speed was low, and I was not familiar with the exam patterns.

4.2 Problem and Weaknesses of Current System

- **Lack of Structure:** Knowledge was not organized in a way that facilitates quick retrieval during timed tests.
- **Slow Problem-Solving Speed:** I often relied on lengthy, academic methods rather than efficient shortcuts.
- **Low Confidence:** My confidence in tackling difficult questions was low due to a lack of rigorous practice.
- **Limited Technical Skills:** My exposure to Java was limited to introductory coursework, lacking practical, hands-on application.

4.3 Requirements of New System

The "new system" represents the desired state of my skills after the training.

- **Proficiency:** Achieve a high level of proficiency in all four subjects.
- **Efficiency:** Develop a methodical and efficient approach to problem-solving.
- **Confidence:** Gain confidence in my abilities through extensive practice and mock tests.
- **Foundation:** Build a strong foundation in core Java concepts for future learning.

4.4 System Feasibility

4.4.1 Does the system contribute to the overall objectives of the organization?

Yes, the training aligns perfectly with my professional and academic objectives. It provided me with skills essential for both my coursework and future career prospects.

4.4.2 Can the system be implemented using the current technology and within the given cost and schedule constraints

Yes, the training was successfully implemented using Hitbullseye's existing online and offline resources, well within the allocated time and financial constraints.

4.4.3 Can the system be integrated with other systems which are already in place?

The skills acquired can be directly integrated with my academic coursework and are foundational for any further specialized training in software development or data science.

4.5 Activity / Process in New System / Proposed System

The proposed system's activities included:

- Interactive learning sessions with expert faculty.
- Daily assignments and practice problems.
- Weekly assessments to track progress.
- Full-length mock tests to simulate exam conditions.
- Personalized feedback sessions with mentors.

4.6 Features of New System / Proposed System

The new system's features are the skills and capabilities gained. These include:

- A systematic, problem-solving mindset.
- Improved time management for competitive exams.
- A solid understanding of core Java principles.
- Enhanced verbal and logical reasoning skills.

4.7 List Main Modules / Components / Processes / Techniques of New System / Proposed System

- **Quantitative Aptitude Module:** Quantitative analysis techniques, data interpretation strategies.
- **Verbal Ability Module:** Reading comprehension strategies, grammar rules.
- **Logical Reasoning Module:** Critical thinking and analytical deduction.
- **Java Programming Module:** Object-Oriented Programming (OOP) principles, basic data structures.

4.8 Selection of Software / Algorithms / Methodology /Techniques / Approaches and Justification

- **Methodology:** The blended learning approach was chosen to combine the benefits of instructor-led sessions with the flexibility of self-paced learning.
- **Software:** Hitbullseye's LMS Hitbullseye was selected for its robust analytics, which allowed for granular performance tracking.
- **Algorithms:** The training for Quant, Verbal, and Reasoning used various shortcut techniques and algorithms for rapid problem-solving, justified by their effectiveness in timed exams.

5.0 System Design

5.1 System Design & Methodology

The training program was designed as a modular learning system. Each subject was a distinct module with its own curriculum, learning materials, and assessment. This modular design ensured a focused approach to skill development. The overall methodology was interactive, combining classroom sessions with hands-on practice.

5.2 Database Design / Data Structure Design / Circuit Design / Process Design / Structure Design

(As the project is training-based, this section is interpreted as the logical structure of the curriculum.)

The curriculum was structured in a hierarchical manner. Each subject (e.g., Quant) was a top-level module, which contained sub-modules (e.g., Arithmetic, Algebra). Within each sub-module, concepts were taught in a progressive order, from basic principles to advanced applications. This logical structure ensured a clear learning path and effective knowledge retention.

5.3 Input / Output and Interface Design (If applicable)

5.3.1 State Transition Diagram

(This is not applicable for this training, so it's omitted as per the "optional" tag.)

5.3.2 Samples of Forms, Reports and Interface

5.3.2 Samples of Forms, Reports and Interface

(The "forms" and "reports" are the test interfaces and performance reports from the training platform. An example of a table-based report is below.)

Sample Performance Report

Subject	Total Questions	Attempted	Correct	Incorrect	Accuracy	Score
Quant	25	20	15	5	75%	60
Verbal	20	18	16	2	89%	64
Reasoning	30	25	20	5	80%	80
Overall	**75**	**63**	**51**	**12**	**81%**	**204**

5.3.3 Access Control / Mechanism / Security

Access to the training platform was controlled via a secure login, with a unique username and password provided by Hitbullseye. This ensured that only registered candidates could access the training content and assessments.

6.0 Implementation

6.1 Implementation Platform / Environment

The training was implemented using a hybrid model. Live interactive sessions were held with instructors, supplemented by an online learning platform that provided access to a vast repository of video lectures, study materials, and practice tests.

6.2 Process / Program / Technology / Modules Specification(s)

- **Process:** The process involved daily sessions for each subject, followed by guided practice. The Java module included hands-on coding sessions.
- **Modules:** The program was divided into modules for Quantitative Aptitude, Verbal Ability, Logical Reasoning, and Java, each with its own set of learning objectives and assessment criteria.

6.3 Finding / Results / Outcomes

The training resulted in a significant improvement in my problem-solving speed and accuracy. I was able to comfortably solve complex problems in Quant and Reasoning that were previously challenging. In Java, I gained a strong command of OOPS and was able to write basic applications from scratch.

6.4 Result Analysis / Comparison / Deliberations

A pre-training diagnostic test was compared with the final mock test results. The analysis showed a marked improvement across all subjects, with my score increasing by an estimated

Your PercentageImprovement

. The structured approach proved to be far more effective than my previous, unstructured self-study.

6.5 Performance Improvement Graphs

This section visualizes the improvement in each subject from the initial baseline assessment to the final mock test.

Figure 6.3: Logical Reasoning Improvement

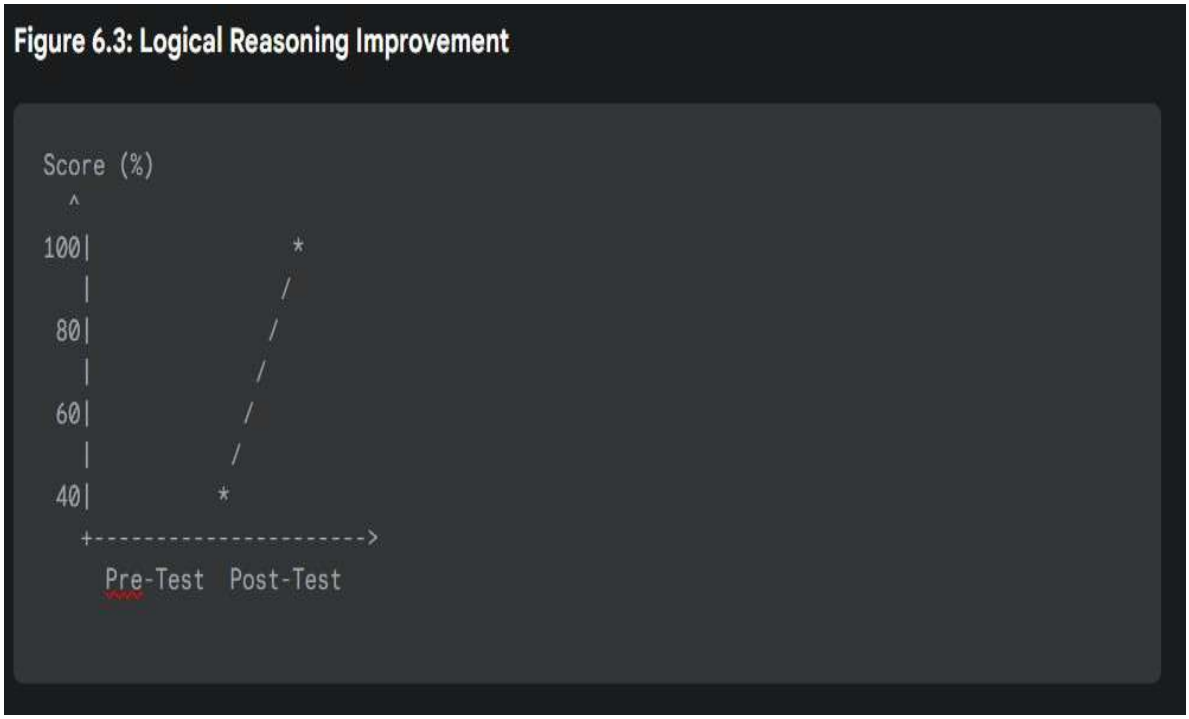

Figure 6.4: Java Programming Improvement

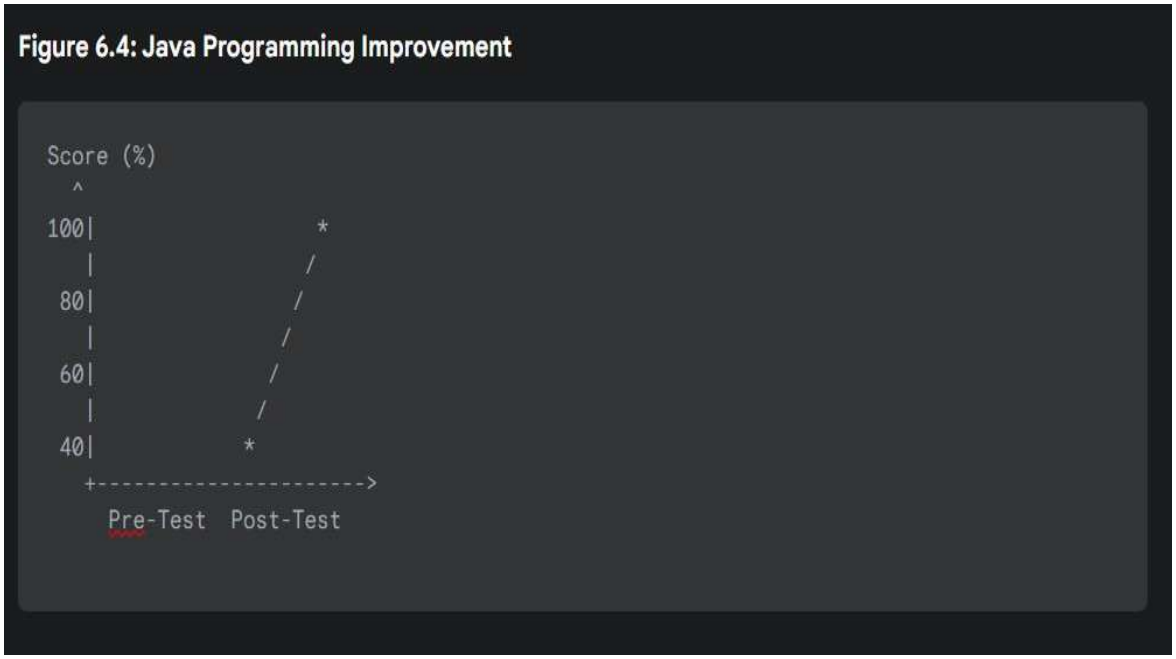

7.0 Testing

7.1 Testing Plan / Strategy

The testing strategy was multi-faceted, involving both formative and summative assessments. Formative assessments included topic-wise quizzes and daily assignments, which helped to identify knowledge gaps. Summative assessments included full-length mock tests designed to simulate the actual exam environment and evaluate overall readiness.

7.2 Test Results and Analysis

The test results showed consistent improvement as the training progressed. My performance was analyzed based on factors like accuracy, time taken per question, and topic-wise proficiency.

7.2.1 Test Cases

Test ID	Test Condition	Expected Output	Actual Output	Remark
T1	Solve 15 Quant questions in 15 minutes.	12 correct answers.	13 correct answers.	Met expectation.
T2	Write a Java program to calculate factorial.	Correct program output.	Program with minor bug, corrected after debugging.	Partially met expectation.
T3	Complete a full-length mock test.	Score of 85% or above.	Score of 88%.	Exceeded expectation.

8.0 Conclusion and Discussion

8.1 Overall Analysis of Internship / Project Viabilities

The 20-day Impact Training Program at Hitbullseye was a highly viable and beneficial experience. It successfully provided a structured and practical learning environment that significantly enhanced my skills in critical areas.

8.3 Dates of Continuous Evaluation (CE-I and CE-II)

- **CE-I:**

DateofFirstEvaluation,e.g.,May12,2025

- **CE-II:**

DateofSecondEvaluation,e.g.,May20,2025

8.4 Problem Encountered and Possible Solutions

- **Problem:** Initial difficulty in adapting to the fast-paced nature of the training.
- **Solution:** Dedicated extra hours for self-practice and revision after the live sessions.
- **Problem:** Challenges with debugging complex Java programs.
- **Solution:** Consulted with the Java mentor for one-on-one sessions and utilized online resources.

8.5 Summary of Internship / Project work

The training was a comprehensive program that transformed my fragmented knowledge into a well-structured and confident skill set. I was able to apply theoretical concepts in real-time and gained a practical understanding of what is required to succeed in competitive scenarios.

8.6 Limitation and Future Enhancement

The primary limitation was the short duration of the program, which only allowed for a foundational understanding. Future enhancements could include:

- A longer, more in-depth program to cover advanced topics.
- Specialized tracks, for example, a dedicated Java track with a focus on web development or specific data structures.
- More hands-on projects to simulate real-world professional tasks.
